

I am absolutely opposed to this measure. There is too much control now in the hands of too few. I am appalled at how this has been done with no comment period. I am a life-long Republican, however today I am ashamed to be a Republican. Chairman Powell & all the other Republicans should immediately resign. Chairman Powell is obviously not from the same mold as his father. I have been in the banking business for over 30 years & have been president of a small community bank for the past 7 years. We are facing a similar situation in the House of Representatives with HR-1375 [introduced & supported by Republicans] which will allow commercial companies such as Walmart to enter the banking business & not be regulated by the Federal Reserve. What has become of Republicans who were for the small business.
